Remodeling Clinical Operations With Our AI-powered Hospital System

Front Desk Management

Module of HealthDesk aintenance tricks for appointments. Doctors scheduling. Patients track online payment thru website and issuance of Birth Certificate/Dead Certificates, and generate multiple valuable reports etc. The room allocation information is real time and exact location/bed of the patient at that particular point in time is constantly updated.

OPD Management

OPD Registration When a patient comes to the reception desk, A new registration number is automatically Allotted to him. His personal details like Name, Age, Sex, Address etc. and the services desired are feeded into the software.OPD Billing/Collection Billing of all OPD patients with complete details of Patient Information, Services provided like Consulta- tion, Laboratory, X- ray, Ultrasound, Medicines, Procedures etc. along with Payment details.

IPD Management

IPD registration When a patient comes to the reception desk for admission, A Separate new registration number is automatically allotted to him. His personal details along with the details of Admission, Room, Consultant, Surgeon, Diet, etc. and the Advance Payment made are fed into the software. The Software will record all this information and print the related documents. IPD Billing On-line billing of all IPD patients with details of Patient Information, Services provided on daily basis like Room rent, Operation, Delivery, Oxygen & Other Gases, Consultation, Nursing Charges, Laboratory tests, X-ray, Ultrasound, Medicines, Procedures etc.

Billing Management

Billing management system is a flexible solution for efficient billing without manual errors and time consumption. The module is highly customizable to adjust to client's unique needs. It is capable of handling and recording various payment types such as cash or credit, partial or full payment and dues or defaulters. This hospital billing system involves posting into individual accounts, voucher printing, preparing bills and Billing analysis etc.

Doctor Management

Doctors Management System is an inexpensive for the Receptionist's appointment book. HealthDesk keeps track of the patient's current insurance coverage, no-show appointments, Easy "click and fix" appointment - with reason for visit. Full view of patient's demographics and insurance details, Tracks availability of multiple doctors at multiple offices, Quick new patient registration directly from this module.

Patient Management

The system also acts as a patient management system, which tracks patient's information at all levels right from the registration to doctor's prescription, prescribed tests, reports, payment, dues and information about his previous visits. With expert logic, user-friendly interface and security imposed throughout the system, HealthDesk delivered its clinic management system to many reputed clients located across the globe. Managing the patient flow effectively is a real time requirement. We have made this tricky process simple.

TPA

HealthDesk's Third Party Administrator (TPA) acts as an intermediary between health insurance companies and hospitals to streamline the insurance claim process. In the Healthdesk software, the TPA module helps hospitals efficiently manage patients' insurance claims. Through this module, hospital staff can easily verify insurance details, initiate claim processing, and track reimbursements. Integration with TPAs accelerates claim settlements, reduces paperwork, and enhances the overall patient experience. This feature increases transparency and accuracy in hospital operations, ultimately improving hospital management and patient satisfaction.

MIS Report

The Report module is a fundamental module of HealthDesk which generates numerous reports that includes Frontdesk details, Patient registrations, Patient admissions, Doctors, Nurses & ward's reports and many more. All modules and the desired reports can be generated according to the required users.

Control Panel

Access right at module and function level allow for control and accountability.

i) Create Users: You can be create users by the software.

ii) Users Group: It can be uses among a group of employees in a single time.

iii) User's Right: Administration allows an admin to have full control on delegation of authority to the various employees so that their domain of operation may be restricted to their own department only. No employee is able to see/edit/modify the information that is not pertinent to his/her role in the organization. This acts as a great management tool and allows authorities to have direct control over the employees' access to the software and to the Hospital's information resources in general.
